MOUNT VERNON **DISTRIBUTION**

Complete Distribution Solutions

WHERE IT BEGINS

Located in Johnston, SC we are 14 miles from I-20, near Augusta GA. We are positioned for quick access to the ports of Charleston, SC and Savannah, GA for ocean container delivery.

Nine docks for easy delivery and a trailer drop lot eliminate long waits for access. Upon receipt, goods can be de-palletized and stored in cases, bales, rolls, or individual SKUs. Individual SKUs can be stored in enclosed plastics storage units for protection.

300,000 square feet of floor space featuring high bay racked storage allows for ample space for your goods. Drive-in pallet racks provide quick and safe turnaround for palletized goods.

CUSTOM PACKING OPTIONS

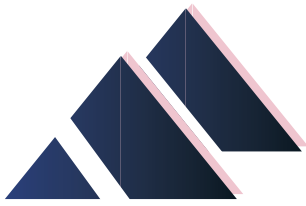

The Mount Vernon Custom Distribution Network is capable of meeting all of your product distribution needs.

We can process standard case pack orders as well as custom Direct to Store or Consumer orders that consist of a random product mixture. The system is capable of processing on average over 26,000 packages or 4,000 cases in a single 8 hour shift. The orders are processed through a fully automated conveyor system to reduce man hours and cost in the handling of the product.

Our automated pick and pack can provide multiple SKU's per case for unlimited assortment options. Dual counts and weight verifications help ensure your goods are packed with no errors. Individual case packing lists generated at our pack stations provide your clients with accurate documentation for their receipts. Individual unit bar-coding for pre-price and tracking can be provided by customer suited to your delivery destinations.

Bar-coded UCC 128 shipping labels provides easy scanning of receipts at your location.

MOUNT VERNON DISTRIBUTION

Complete Distribution Solutions

SHIPPING

Twelve Docks for shipping ensures driver waits are eliminated. Goods can be case loaded or palletized to fit your delivery needs. Bill of Ladings can be customized to fit your exact needs. Goods can be shipped by your choice of carriers including our own in-house LTL carrier.

SYSTEMS SUPPORT

Our Customized ERP system can handle multiple EDI Documents including 850 PO, 856 Advanced Ship Notice, and 810 Invoice. The system is also integrated with UPS and FEDEX via the EDI 215 shipping manifest document. Shipping information is automatically transmitted electronically to insure that your goods gets to your customer in an efficient manner.
